AB - A support belt has a back support pad and an abdominal support pad  
for supporting both the back and abdomen during strenuous  
activity. The support pads are secured to one another by belt side  
portions which are of a vertical height which provides clearance  
between the ribs and hips of the wearer, maximizing abdominal and  
back support with a minimum of discomfort. Utility rings may be  
secured to the belt for attaching harnesses and the like to assist  
with support during strenuous activity.
